

**TREASURE COAST
ENGINEERING**
Your MEP Design Consultant

Jan 1, 2009

Treasure Coast Engineering, Inc., known around the state as a quality Electrical Engineering firm, has expanded its offerings to **now include full Mechanical-Electrical-Plumbing (MEP) engineering services to its clients.**

This will make them a one stop shop for all building engineering and design needs. This expansion includes bringing on a partner who is a LEED-AP mechanical engineer and having an additional electrical-mechanical engineer who does all the CAD work.

TCE will continue to be the only electrical engineer in the area who does thermography, power quality studies, energy audits, and ground/earth resistance testing with their own equipment while still offering **full MEP design services.**

Please visit them at www.tce.eng.pro to find more about them or please give Bryant Jenks, PE a call at 772-567-1007 to personally speak to him about how they can be of service to you.
