- Electrical Design
- Energy Audits
- Power Quality Analysis
- Fire Alarm Systems
- Lightning Protection Systems
- High Availability Power Systems
- Site/Interior Lighting Design
- Arc Flash/Coordination Studies

Treasure Coast Engineering, Inc is a consulting engineering firm in Vero Beach, Florida providing electrical design & consulting services. With over 20 years experience with outstanding service and quality design in mind, our enthusiasm for each project illustrates our commitment to the highest level of service in the industry.

## Comprehensive Electrical Consulting Services

- **Architects:** Save money through low overhead engineering.
- **Contractors:** Use us when a PE is needed or special analysis is required.
- **Commercial/Industrial:** Lower overhead by having a PE represent your electrical needs.

- **Datacenters/Networks:** We are the experts in availability!
- **Engineers:** Don't hire! Contract out to save money and have an expert at your service.

- **Home Owners:** Let us put a design together so you can get the lower bids.

### WHAT DO WE OFFER OUR CLIENTS?

20 Years experience with a variety of projects; Reputation of principle; Experience; Responsiveness to budgets and time schedules; Cost consciousness and responsiveness during construction phase.

### HOW WE SAVE YOU MONEY

We run a very low overhead operation. We don't have any leases, loans, or monthly office costs. This presents a

significant reduction in our cost of doing business which we pass on to you through lower cost.

### OUR TOOLS

Everything we do is through "Best in Class" tools. From our software standpoint, we use AutoCAD MEP for our drawings with DesignMaster built in for all electrical/lighting/low voltage circuiting, calculations and schedules. For all arc fault, load flow, and circuit breaker coordination studies we use SKM PowerTools. We have insulation testers, power monitoring, ground resistance meters,

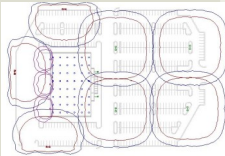

light meters, sound meters, oscilloscopes, current clamps, harmonic analyzers to go on site and address just about every situation.

### WE'RE ON-SITE AND FAST

We take pride in going on site, to meetings, or working with your contractors to get the job done quickly and correctly. We don't take jobs that we can't do in a timely and cost efficient manner.

**ETHICS**  
We stand behind the Florida Board of Professional Engineers ethical policy by doing only jobs

we are qualified to do and not compromising the intent of any legal codes. We strive to be blameless in our outward conduct by

being upright and just in our dealings with others and "being above reproach."

### SPECIAL EMPHASIS

Technologically Intensive Facilities such as Data Centers, Telecom Centers, Network/Emergency Operation Centers, TVSS, Generators, and UPS design.
